

EMPEROR GAMES

# EMPEROR

# WHITE PAPER

## ABSTRACT

Emperor Games(\$EMPI) is an energetic and innovative games platform built on BNB chain, offering a diverse range of fun and engaging games. It features both skill-based and chance-based games, combined with intense mass shooter experiences and dynamic prediction and trading contests. Powered by its native \$EMPI coin, Emperor Games is entirely community-driven, rewarding users for their participation and achievements. As a crypto-based ecosystem, it fosters a vibrant gaming community where players can earn, trade, and compete in a secure and fast environment. With its own unique game ecosystem and decentralized governance, Emperor Games delivers endless entertainment and real value to its users.

# Introduction

Driven by the demand and Emperor's ambition to build great products, Emperor has evolved into a next-generation Gaming Web3 Ecosystem - fully integrated Game Hub, a curated gamified Launchpad, mass shooter, trading and fun games, with a native token economy designed to reward engagement and community contribution.

At its core, the Emperor Universe exists to reshape how people have fun, earn and interact with crypto:

- Unique Emperor gaming experience with in-house developed and external games - Meme Trader, Meme Crash, Wheel of Emperor, etc
- Launchpad Emperor X that levels the playing field through a gamified traded and Meme launches
- Mass shooter game Last Emperor, based on skill and luck
- Play prediction markets for fun and earn - Emperor Markets
- Token, designed to grow with the ecosystem, not drain it

## The Emperor's mission:

Build a fair, powerful, innovative and entertaining crypto Games Empire - one that rewards its community, inspires confidence, and stands the test of time.

## The Future of Emperor Games

The Emperor's vision and scope are expanding massively, new features were delivered daily, community grew significantly.

To create the huge and dynamic Emperor Ecosystem, we needed an own game engine.

With \$EMPI, we are securing every single aspect of the Emperor Universe:

- Limited and Maxed supply
- Securely locked vesting for long-term sustainability
- Optimized tokenomics to align incentives, reduce dumping, and reward actual participation

- Improved structure and ecosystem integration to connect the token directly to gameplay, launchpad activity, and trading dynamics

This isn't just a new product - it's a new standard. \$EMPI is the core of a next-level platform, built for fairness, fun, and real token performance. For our early believers the new gaming experience represents a smarter, more future-proof evolution.

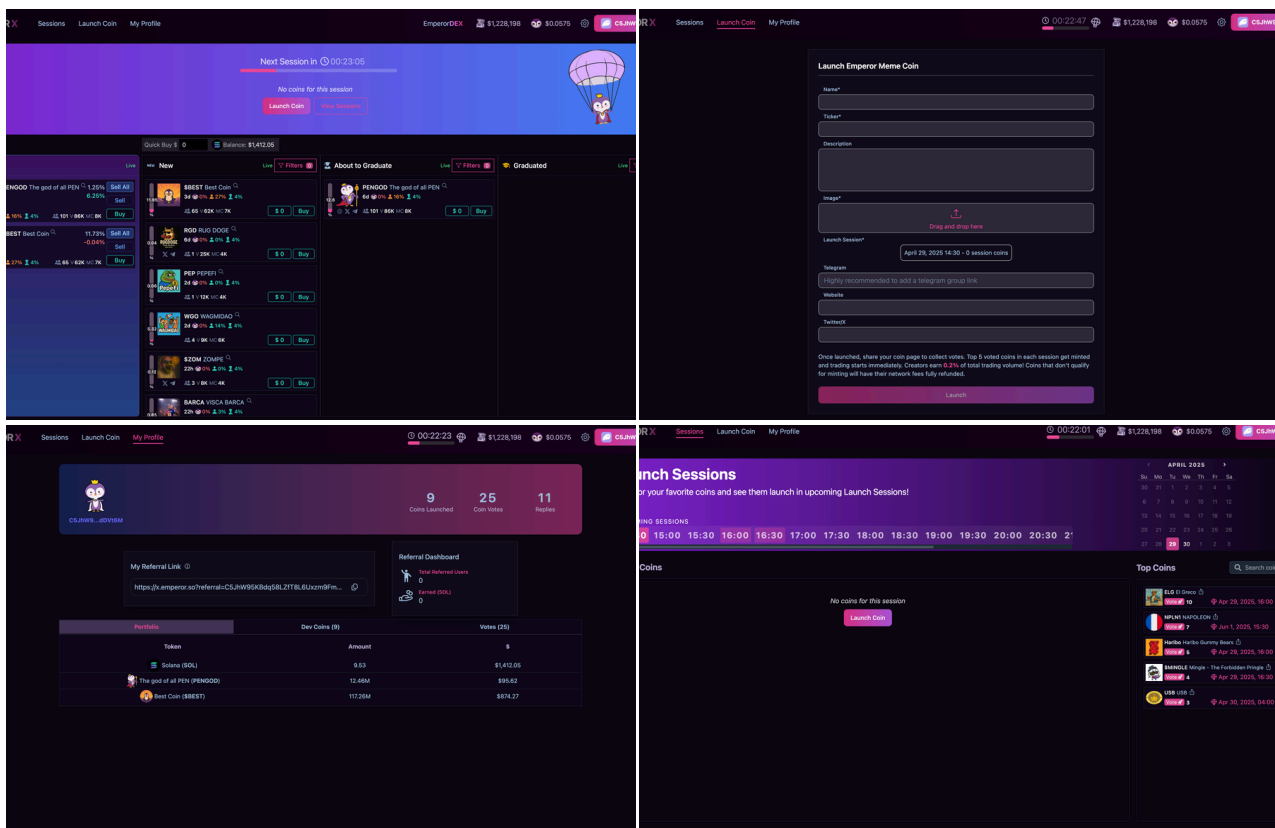

## The Emperor Ecosystem

The Emperor Ecosystem is built to be more than just a place to play or trade - it's an interconnected world where every action drives another. Powered by the \$EMPI token, our platform combines four core building blocks into a unified economy.

### Emperor X

At the very heart of Emperor is a completely reimagined launchpad - one built on fairness, accessibility, and game-like thrill. Unlike traditional launchpads that reward whales, bots and insiders, Emperor's Launchpad introduces a fun model, sweepstake style, where every trade becomes an amazing fun experience with even bigger chance to profit than the traditional launchpads. Our early supporters are well aware that we have already validated the model and the engine with 1000 real traders in May/June during the Emperor DEX + X MVP roll out, How it works:

- Users trade using virtual eBNB, By scaling entries through eBNB users will have better control on their strategy and limits, also future mini algos will be introduced
- Every 30 minutes, the platform lists only 5 new coins, maximizing visibility and giving each project room to breathe. This limited exposure increases the probability of token pumps and prevents overcrowding
- On special events the coins with the highest volume are graduated on blockchain and the Meme liquidity (around 40 eBNB) is air dropped to the volume makers of the virtual coin and trading of the coin goes from virtual to real blockchain mode. In future releases Emperor DEX will be utilized to manage the graduated coins, leveraging its unique community-driven features, speed and low fees.
- Every trader has equal chances to buy in the beginning of the liquidity on the best price, based on fair race
- Rewards Flow Back Into \$EMPI:
  - 0.2% of the total volume is redistributed to the \$EMPI to support token demand.
  - 0.2% goes to the referrer, 0.2% to the coin developer
  - No dev buys to drastically reduce the risk of rugs
- \$EMPI will fuel unique Meme trading contests and rewards

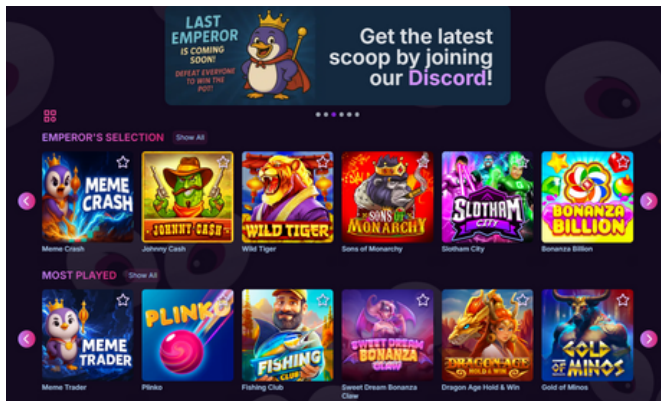

## Emperor Games

The Emperor Games hub is designed to merge top-tier entertainment with real token utility. Emperor Games brings together a mix of original, custom-built titles that are skill, luck and fun. Thousand of players already enjoy the platform

### Key Features:

- Custom-Built Originals: Games developed in-house, optimized for playability and token integration
- Unique Rewards engine with welcome, daily, streak and referral rewards
- Meme Trader Action game launched!
- Meme Trader Action game launched!
- Wheel of Emperor - launched!
- Play-to-Earn Mechanics: players' eBNB can translate into crypto rewards
- My Empire - every player customizes its own Prince/Emperor character, using different items and artefacts. They will be converted into various game play advantages, especially in the Last Emperor game. NFT Avatars coming soon also
- Leaderboards, community-driven sharing, and integrated voting systems are designed to ensure that players feel empowered, valued, and safe within the Emperor Games ecosystem

## The Last Emperor

The Last Emperor is a one-of-a-kind, fast-paced mass shooter where only the strongest survive – and the last player standing takes it all. The game is officially launching now!

- Powered by a proprietary game engine, Last Emperor delivers a thrilling multiplayer experience that blends skill and chance - defining the new \$EMPI Games genre.
- Quickfire matches lasting just one minute keep every round intense and engaging. Players can select their preferred battle rooms for tailored gameplay and entry fees.
- The \$EMPI token is seamlessly integrated into the ecosystem – serving as an e discount package while powering rewards, competitions, and in-game challenges.
- Private rooms and team battles are on the horizon, expanding strategic depth and social competition.
- Every player avatar will soon wield custom items, unlocking a new era of personalization, progression, and digital value.

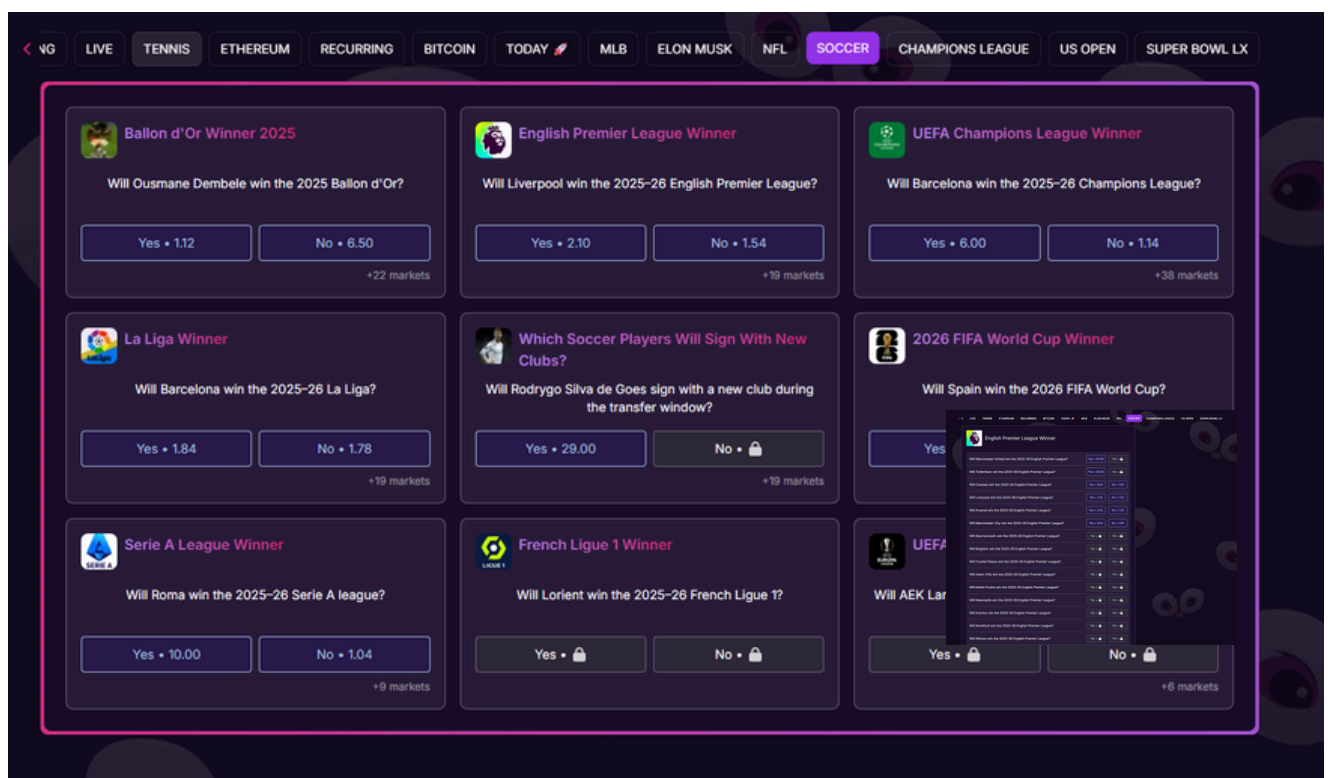

## Emperor Markets

Emperor Markets expands the Emperor ecosystem into the frontier of collective forecasting, empowering the community to engage with outcomes spanning sports, digital assets, politics, global events, and beyond. Unlike traditional exchange-driven prediction platforms, Emperor Markets is intentionally designed for clarity and inclusivity—allowing anyone to participate without requiring prior expertise.

At its core, the platform fosters a community-first, entertainment-driven experience. Barriers to entry are minimized so newcomers can forecast instantly, while seasoned participants have the opportunity to sharpen strategies, share insights, and build reputations over time. Rewards are collected in Emperor Play Market Pools and after resolving the market/event, the rewards are distributed among the winners.

Seamlessly integrated with the \$EMPI token economy, Emperor Markets transforms individual predictions into dynamic engines of ecosystem activity—amplifying token utility, driving collective engagement, and advancing the vision of a decentralized empire where entertainment, participation, and strategy converge.

# Tokenomics

- **Total supply: 100M \$EMPI** 
- Anti rug - CLIFFs and vesting
- Designed to store value, fuel and further innovate Emperor Games

## Private sale 5M \$EMPI

5,000,000 tokens,  
0% TGE, 6 months CLIFF, 12  
months linear vesting

## Team 15M \$EMPI

15,000,000 tokens,  
0% TGE, 12 months CLIFF, 24  
months linear vesting

## Advisors 10M \$EMPI

10,000,000 tokens,  
0% TGE, 6 months CLIFF, 24

## Marketing 10M \$EMPI

10,000,000 tokens,  
0% TGE, 3 months CLIFF, 36  
months vesting

## Initial Liquidity 4M \$EMPI

4,000,000 tokens,  
will be available for trading on  
Raydium on 29<sup>th</sup> of September  
and BitMart on 6<sup>th</sup> of October

## Liquidity 6M \$EMPI

6,000,000 tokens,  
vested for 6 months to ensure  
enough liquidity is always  
available

## Treasury 10M \$EMPI

10,000,000 tokens,  
18 months CLIFF, 36 months  
linear vesting.

## Community 40M \$EMPI

40,000,000 tokens,  
1% of total supply unlocked  
on TGE, 3 months CLIFF, 36  
months linear vesting

**Tokenomics Distribution of \$EMPI (100M Supply)**

## Tokenomics Overview

The total supply of **100,000,000 \$EMPI** tokens, with about 95% locked in vestings, is allocated strategically to support ecosystem growth, incentivize participation, and ensure Emperor Games long-term development. \$EMPI design and implementation ensures its main goal - real store of value with great demand. The distribution is as follows:

### **Private Sale (5,000,000 \$EMPI - 5%)**

Allocated to early investors, strategic backers and pure \$EMPI believers, that provided initial capital for development and ecosystem expansion.

### **Team (15,000,000 \$EMPI - 15%)**

Reserved for the core contributors and builders of the Emperor ecosystem, distributed with most conservative cliffs and vesting schedules to ensure long-term alignment and commitment.

### **Advisors (10,000,000 \$EMPI - 10%)**

Designated for strategic partners and advisors who contribute expertise, operations, guidance, and connections critical to the project's success.

### **Marketing (10,000,000 \$EMPI - 10%)**

Dedicated to awareness campaigns, partnerships, community growth initiatives, and all kind of marketing and branding efforts to drive global adoption of Emperor Markets.

### **Treasury (10,000,000 \$EMPI - 10%)**

Reserved and maintained as a reserve to fund future ecosystem development, strategic partnerships, liquidity support, and fundamental opportunities that may arise.

### **Community (40,000,000 \$EMPI - 40%)**

Allocated to community incentives, governance participation, rewards, and grassroots initiatives to ensure strong user engagement and long-term ecosystem health ecosystem grants, 1% of the max supply will be airdropped to Emperor's early supporters of Emperor DEX and to the Emperor Games most active contributors.

### **Initial Liquidity (4,000,000 \$EMPI - 4%)**

Provided to establish liquidity pools at launch, ensuring stable market entry and smooth trading experiences for participants. 50% for **Raydium launch on 27<sup>th</sup> of October**, 25% for **BitMart listing on 3<sup>rd</sup> of November** and 25% for additional \$EMPI listings on a number of CEX

### **Liquidity (6,000,000 \$EMPI - 6%)**

Reserved to strengthen liquidity over time, supporting trading stability and reducing volatility as the ecosystem grows.

## Token Utility

\$EMPI it's the backbone of the entire Emperor ecosystem. Every product, every interaction, and every user action is tied back to the token, ensuring consistent demand and deep-rooted utility. \$EMPI is designed as store of value, real utility token, applying the most conservative vesting and locking policies and best practices in the industry. The initial Community airdrop of 1% will target the Emperor community and early Emperor DEX project supporters - PEN buyers. \$EMPI will be the most restricted token on the market and will provide real token utility usage:

- \$EMPI will be utilized to provide eBNB packages discounts
- \$EMPI will be natively integrated in the Last Emperor game
- \$EMPI will be the fuel of the Emperor X Launchpad
- \$EMPI will be the base of Emperor Markets
- All typed of competitions, challenges and rewards will be organized based on the \$EMPI
- \$EMPI will be used for gaming, trades. battle entries, avatar customizations, items and more. Players will earn points by participating in the ecosystem (trading, earning, referring) and use \$EMPI to unlock discounts, in-game advantages, items, and power-ups. Future features like PvP betting and leaderboard prizes will be paid out or accessed via \$EMPI
- \$EMPI airdrops and burns will be enabled as part of the game mechanics - all Emperor profits from the platform will trigger EMPI burns
- \$EMPI will be integrated in a number of partners products, and \$EMPI owners will receive discounts and bonus perks, adding optional but meaningful utility for holders

### Governance (Coming Soon)

- \$EMPI holders will help shape the future of the ecosystem through governance votes. These will include decisions on marketing and game policies, game reward pools, feature rollouts, etc.
- Referral & Loyalty Rewards

This controlled \$EMPI emission from the Community treasury provides a consistent flow of rewards distributed across various platform activities:

- Emperor Games Rewards
- Trading Awards
- Referral Program
- Additional Bonuses and Rewards

## Security and Transparency

At Emperor, security is a foundational priority. In a landscape rife with rug pulls and exploits, Emperor provides users with a safe, transparent, and trustworthy environment – backed by automation and on-chain governance.

### Smart Contract Security

- Modular Architecture limits attack surfaces and enables safe, isolated upgrades.
- Permission Limits and immutable core contracts prevent backend tampering.

### Protocol Safeguards

- 24/7 On-Chain Monitoring for suspicious activity, anomalies, or contract abuse.
- Liquidity Lock Alerts shown before users trade, helping avoid unprotected tokens.
- Anti-Rug Logic: All treasuries are locked and only a limited amount of EMPI will be in circulation together with the Initial Liquidity

### Treasury & Governance

- Multi-Signature Wallets secure treasury functions and admin privileges.
- DAO Control: Protocol emissions and updates will be governed by \$EMPI holders.

### Threat Response & Transparency

- Verified Domains & Signature Prompts protect users from phishing.
- Transparent Upgrade Notices and a coming Security Centre for audits and live alerts.

**Emperor doesn't just enable gaming and trading, it protects traders. Every layer of the ecosystem is designed for long-term resilience and user trust.**

# Roadmap

## Q2 2025

- [Emperor Games](#) launch- **DONE**
- [Wheel of Emperor](#) launch - **DONE**
- [Meme Trader](#) launch - **DONE**
- Marketing plan and execution start - **DONE**

## Q3 2025 – Product Expansion & User Engagement

- [Meme Crash Game](#) launch - **DONE**
- Partnerships and marketing channels
- Last Emperor mass shooter launch - **COMING SOON**
- **Raydium listing - 27<sup>th</sup> of October**
- **CEX listing: BitMart - 3<sup>rd</sup> of November**
- Emperor Games enhancements
- Regional ambassador program + local Telegram/TikTok task forces
- Launch "EMPI Community Tier System" – loyalty rewards for holders and participants

## Q4 2025 – Expansion & DAO Onboarding

- Launch of Emperor Launchpad v2 (sweepstake)
- DAO voting beta for game development, token emissions, and launch approvals
- NFT-gated rewards across Launchpad + Games
- Creator revenue share system and mint royalties
- Big influencers and product partnerships

## Q1 2026 – Scaling Infrastructure & UX

- Launch of Emperor Mobile App (MVP) with Launchpad, Games & DEX access
- Advanced trading features on DEX: limit orders, portfolio tracking
- XP + Tier system rollout across all products
- Release of Creator & Trader Analytics Dashboard
- Strategic partnerships with huge wallet apps + NFT tools
- Begin fiat on-ramp UX testing

## Q2 2026 – Global Access & Institutional Alignment

- \$EMPI staking launch + long-term holder reward pools
- Launch of "Emperor Market Index" – top tokens, players, and XP dashboards
- Regional expansion via language-localised portals and campaigns
- CEX Tier-1 listing push (targeting OKX, Bybit)
- Full rollout of Emperor Treasury Dashboard for earnings transparency
- Gamified empire-building challenge: long-form competition tied to governance

# Emperor Unique Selling Points

Emperor Games in introducing new dimensions in the crypto gaming universe

- The Last Emperor
  - multiplayer
  - skill based game
  - mass fun shooter
  - crypto native integrated
  - community battles, private battles etc
- Emperor Play Markets are unique fun and community remake of exchange markets and predictions
  - Players choose their preference and play/enter the pool
  - Pools generate rewards and after market/event resolution rewards are distributed between the winners
  - Various market/events are supported

Fairness by Design

- Unlike traditional launchpads that prioritize big wallets or insider deals, Emperor X introduces a sweepstake launch model with:
  - No dev buy caps
  - Limited listings (5 coins per 30 minutes)
  - Automated buybacks of \$EMPI from trading volume

Unified Token Ecosystem

- \$EMPI is the central currency across Emperor Play Markets, Emperor X, Last Emperor and Emperor Games
- It's not just a pass-through token – it's actively bought back, used for perks, and embedded into every layer of the experience.

GameFi + TradeFi Synergy

- Most gaming tokens or launchpads operate in isolation. EMPI creates a feedback loop: trade → earn points → play games → earn rewards → buy NFTs → gain perks → trade better. Every action fuels another – all connected by \$EMPI.

Market Capture Strategy

Emperor go-to-market approach focuses on:

- 1.Targeting underserved but hyper-engaged regions (e.g. Southeast Asia, Turkey) through ambassadors and mobile-first UX
- 2.Leveraging virality via Twitter/Telegram/Discord campaigns and sweepstake gamification
- 3.Incentivizing activity loops, not just token holding – players and traders are rewarded for doing what they already enjoy
- 4.Onboarding creators through no-code NFT tools and profit-sharing launchpad mechanics
- 5.Focus on community trust, transparency, and fairness, a clear gap in most crypto launchpads

In short, while others fragment user attention, EMPI builds one empire – unified, gamified, and engineered for long-term dominance.

## Conclusion

Emperor is more than a project – it's a living, expanding gamified Web3 empire.

Featuring gamified launchpad built on fairness, a dynamic gaming hub with real value flows, a unique gaming platform for creators, own unique games like Last Emperor, Meme Trader, Meme Crash, Wheel of Emperor etc, all connected, designed to reinforce the others, and built for the long term.

At the heart of this growing empire is \$EMPI – the token that powers, connects, and rewards participation across the entire platform. But \$EMPI is not the brand – Emperor is. The Emperor brand represents scale, quality, fairness, and vision. It's the infrastructure layer for Web3 entertainment, creator economies, and next-generation token launches.

We're not here to chase trends. We're here to build a legacy.

As the Emperor ecosystem expands through gameplay, trading, future NFT innovation, and community-led governance, its mission remains clear:

To create the most rewarding, transparent, and engaging ecosystem in Web3, where users aren't just players, they're stakeholders.

Whether you're a builder, investor, gamer, or creator, this is your empire too.

## The Emperor is rising
