

EMPEROR

WHITE PAPER

ABSTRACT

Emperor Games(\$EMPI) is an energetic and innovative games platform built on BNB chain, offering a diverse range of fun and engaging games. It features both skill-based and chance-based games, combined with intense mass shooter experiences and dynamic prediction and trading contests. Powered by its native \$EMPI coin, Emperor Games is entirely community-driven, rewarding users for their participation and achievements. As a crypto-based ecosystem, it fosters a vibrant gaming community where players can earn, trade, and compete in a secure and fast environment. With its own unique game ecosystem and decentralized governance, Emperor Games delivers endless entertainment and real value to its users.

Introduction

Driven by the demand and Emperor's ambition to build great products, Emperor has evolved into a next-generation Gaming Web3 Ecosystem - fully integrated Game Hub, a curated gamified Launchpad, mass shooter, trading and fun games, with a native token economy designed to reward engagement and community contribution.

At its core, the Emperor Universe exists to reshape how people have fun, earn and interact with crypto:

- Unique Emperor gaming experience with in-house developed and external games Meme Trader, Meme Crash, Wheel of Emperor, etc
- Launchpad Emperor X that levels the playing field through a gamified traded and Meme launches
- Mass shooter game Last Emperor, based on skill and luck
- Play prediction markets for fun and earn Emperor Markets
- · Token, designed to grow with the ecosystem, not drain it

The Emperor's mission:

Build a fair, powerful, innovative and entertaining crypto Games Empire - one that rewards its community, inspires confidence, and stands the test of time.

The Future of Emperor Games

The Emperor's vision and scope are expanding massively, new features were delivered daily, community grew significantly.

To create the huge and dynamic Emperor Ecosystem, we needed an own game engine.

With \$EMPI, we are securing every single aspect of the Emperor Universe:

- Limited and Maxed supply
- · Securely locked vesting for long-term sustainability
- Optimized tokenomics to align incentives, reduce dumping, and reward actual participation

 Improved structure and ecosystem integration to connect the token directly to gameplay, launchpad activity, and trading dynamics

This isn't just a new product - it's a new standard. \$EMPI is the core of a next-level platform, built for fairness, fun, and real token performance. For our early believers the new gaming experience represents a smarter, more future-proof evolution.

The Emperor Ecosystem

The Emperor Ecosystem is built to be more than just a place to play or trade - it's an interconnected world where every action drives another. Powered by the \$EMPI token, our platform combines four core building blocks into a unified economy.

Emperor X

At the very heart of Emperor is a completely reimagined launchpad - one built on fairness, accessibility, and game-like thrill. Unlike traditional launchpads that reward whales, bots and insiders, Emperor's Launchpad introduces a fun model, sweepstake style, where every trade becomes an amazing fun experience with even bigger chance to profit than the traditional launchpads. Our early supporters are well aware that we have already validated the model and the engine with 1000 real traders in May/June during the Emperor DEX + X MVP roll out, How it works:

- Users trade using virtual eBNB, By scaling entries through eBNB users will have better control on their strategy and limits, also future mini algos will be introduced
- Every 30 minutes, the platform lists only 5 new coins, maximizing visibility and giving each project room to breathe. This limited exposure increases the probability of token pumps and prevents overcrowding
- On special events the coins with the highest volume are graduated on blockchain and the Meme liquidity (around 40 eBNB) is air dropped to the volume makers of the virtual coin and trading of the coin goes from virtual to real blockchain mode. In future releases Emperor DEX will be utilized to manage the graduated coins, leveraging its unique community-driven features, speed and low fees.
- Every trader has equal chances to buy in the beginning of the liquidity on the best price, based on fair race
- Rewards Flow Back Into \$EMPI:
 - 0.2% of the total volume is redistributed to the \$EMPI to support token demand.
 - o 0.2% goes to the referrer, 0.2% to the coin developer
 - No dev buys to drastically reduce the risk of rugs
- \$EMPI will fuel unique Meme trading contests and rewards

Emperor Games

The Emperor Games hub is designed to merge top-tier entertainment with real token utility. Emperor Games brings together a mix of original, custom-built titles that are skill, luck and fun

Key Features:

- Custom-Built Originals: Games developed in-house, optimized for playability and token integration - ready
- Unique Rewards engine with welcome, daily, streak and referral rewards ready
- Meme Trader Action game ready and validated!
- Meme Trader Action game launched ready and validated!
- Wheel of Emperor launched ready and validated!

The Last Emperor

The Last Emperor is a one-of-a-kind, fast-paced mass shooter where only the strongest survive — and the last player standing takes it all. The game is officially launched!

- Powered by a proprietary game engine, Last Emperor delivers a thrilling multiplayer experience that blends skill and chance - defining the new \$EMPI Games genre
- Quickfire matches lasting just one minute keep every round intense and engaging.
 Players can select their preferred battle rooms for tailored gameplay and entry fees.
 The rule is simple The Last Emperor takes all!
- The \$EMPI token is seamlessly integrated into the ecosystem serving as an e discount package while powering rewards, competitions, and in-game challenges.
- Private rooms coming soon to enable private battles with friends
- Team battles, already launched, expand strategic depth and social competition
- The Emperor Portal unique luck and fun feature, to find and enter the Gate and win instantly, is coming soon
- Every player avatar will soon wield custom items, unlocking a new era of personalization, progression, and digital value.
- Play-to-Earn Mechanics: players' eBNB translates into crypto rewards
- My Empire every player receives custom Prince/Emperor character, based on EMPI amounts in the account. The feature is coming soon.
- Leaderboards, community-driven sharing, and integrated voting systems are designed to ensure that players feel empowered, valued, and safe within the Emperor Games ecosystem
- Many other features are in the roadmap obstacles, multi snow ball packs, boost packages etc

Emperor Markets

Emperor Markets expands the Emperor ecosystem into the frontier of collective forecasting, empowering the community to engage with outcomes spanning sports, digital assets, politics, global events, and beyond. Unlike traditional exchange-driven prediction platforms, Emperor Markets is intentionally designed for clarity and inclusivity—allowing anyone to participate without requiring prior expertise.

At its core, the platform fosters a community-first, entertainment-driven experience. Barriers to entry are minimized so newcomers can forecast instantly, while seasoned participants have the opportunity to sharpen strategies, share insights, and build reputations over time. Rewards are collected in Emperor Play Market Pools and after resolving the market/event, the rewards are distributed among the winners.

Seamlessly integrated with the \$EMPI token economy, Emperor Markets transforms individual predictions into dynamic engines of ecosystem activity—amplifying token utility, driving collective engagement, and advancing the vision of a decentralized empire where entertainment, participation, and strategy converge.

Tokenomics

- Total supply: 100M \$EMPI
- Anti rug Locked Liquidity, CLIFFs and vesting
- Designed to store value, fuel and further innovate Emperor Games

Private sale 15M SEMPI

20,000,000 tokens, 0% TGE, 6 months CLIFF, 12 months linear vesting

Liquidity 10M \$EMPI

10,000,000 tokens, will be available for trading on Pancake on 27th of October, fair launch

Team 15M \$EMPI

15,000,000 tokens, 0% TGE, 6 months CLIFF, 24 months linear vesting

Treasury 15M SEMPI

15,000,000 tokens, 18 months CLIFF, 36 months linear vesting.

Advisors 15M SEMPI

15,000,000 tokens, 0% TGE, 6 months CLIFF, 24 months linear vesting

Community 30M SEMPI

30,000,000 tokens, 33% of tokens unlocked on TGE, 67% 3 months CLIFF, 36 months linear vesting

Tokenomics Overview

The total supply of **100,000,000 \$EMPI** tokens, with about 88% locked in liquidity and vestings, is allocated strategically to support ecosystem growth, incentivize participation, and ensure Emperor Games long-term development. \$EMPI design and implementation ensures its main goal - real store of value with great demand. The distribution is as follows:

Private Sale (15,000,000 \$EMPI - 15%)

Allocated to early investors, strategic backers and pure \$EMPI believers, that provided initial capital for development and ecosystem expansion.

Team (15,000,000 \$EMPI - 15%)

Reserved for the core contributors and builders of the Emperor ecosystem, distributed with most conservative cliffs and vesting schedules to ensure long-term alignment and commitment.

Advisors (15,000,000 \$EMPI - 15%)

Designated for strategic partners and advisors who contribute expertise, operations, guidance, and connections critical to the project's success.

Treasury (15,000,000 \$EMPI - 15%)

Reserved and maintained as a reserve to fund future ecosystem development, strategic partnerships, liquidity support, and fundamental opportunities that may arise.

Community (30,000,000 \$EMPI - 30%)

Allocated to community incentives, governance participation, rewards, and grassroots initiatives to ensure strong user engagement and long-term ecosystem health ecosystem grants, 50% of the Community tokens will be airdropped to Emperor's early supporters of Emperor DEX and to the Emperor Games most active contributors.

Liquidity (10,000,000 \$EMPI - 10%)

Provided to establish liquidity pools at launch, ensuring stable market entry and smooth trading experiences for participants. **Pancake fair launch on 27**th **of October**

■ Token Utility

\$EMPI it's the backbone of the entire Emperor ecosystem. Every product, every interaction, and every user action is tied back to the token, ensuring consistent demand and deeprooted utility. \$EMPI is designed as store of value, real utility token, applying the most conservative vesting and locking policies and best practices in the industry. The initial Community airdrop will target the Emperor community and early Emperor DEX project supporters - PEN buyers. \$EMPI will be the most restricted token on the market and will provide real token utility usage:

- \$EMPI will be utilized to provide eBNB packages discounts
- \$EMPI will be natively integrated in the Last Emperor game
- \$EMPI will be the fuel of the Emperor X Launchpad
- \$EMPI will be the base of Emperor Markets
- All typed of competitions, challenges and rewards will be organized based on the \$EMPI
- \$EMPI will be used for gaming, trades. battle entries, avatar customizations, items and more. Players will earn points by participating in the ecosystem (trading, earning, referring) and use \$EMPI to unlock discounts, in-game advantages, items, and powerups. Future features like PvP betting and leaderboard prizes will be paid out or accessed via \$EMPI
- \$EMPI airdrops and burns will be enabled as part of the game mechanics all Emperor profits from the platform will trigger EMPI burns
- \$EMPI will be integrated in a number of partners products, and \$EMPI owners will receive discounts and bonus perks, adding optional but meaningful utility for holders

Governance (Coming Soon)

- \$EMPI holders will help shape the future of the ecosystem through governance votes.
 These will include decisions on marketing and game policies, game reward pools, feature rollouts, etc.
- Referral & Loyalty Rewards

This controlled \$EMPI emission from the Community treasury provides a consistent flow of rewards distributed across various platform activities:

- Emperor Games Rewards
- Trading Awards
- Referral Program
- Additional Bonuses and Rewards

Security and Transparency

At Emperor, security is a foundational priority. In a landscape rife with rug pulls and exploits, Emperor provides users with a safe, transparent, and trustworthy environment — backed by automation and on-chain governance.

Smart Contract Security

- Modular Architecture limits attack surfaces and enables safe, isolated upgrades.
- Permission Limits and immutable core contracts prevent backend tampering.

Protocol Safeguards

- 24/7 On-Chain Monitoring for suspicious activity, anomalies, or contract abuse.
- Liquidity Lock Alerts shown before users trade, helping avoid unprotected tokens.
- Anti-Rug Logic: All treasuries are locked and only a limited amount of EMPI will be in circulation together with the Initial Liquidity

Treasury & Governance

- Multi-Signature Wallets secure treasury functions and admin privileges.
- DAO Control: Protocol emissions and updates will be governed by \$EMPI holders.

Threat Response & Transparency

- Verified Domains & Signature Prompts protect users from phishing.
- Transparent Upgrade Notices and a coming Security Centre for audits and live alerts.

Emperor doesn't just enable gaming and trading, it protects traders. Every layer of the ecosystem is designed for long-term resilience and user trust.

Roadmap

02 2025

- Emperor Games launch- DONE
- Wheel of Emperor launch DONE
- Meme Trader launch DONE
- Marketing plan and execution start DONE

Q3 2025 - Product Expansion & User Engagement

- Meme Crash Game launch DONE
- Partnerships and marketing channels DONE
- The Last Emperor mass shooter launch DONE
- Emperor Games enhancements DONE
- Launch "EMPI Community System" loyalty rewards for holders and participants DONE

Q4 2025 - Expansion & DAO Onboarding

- Pancake listing 27th of October DONE
- CEX listing: BitMart 3rd of November DONE
- DAO voting beta for game development DONE
- The Last Emperor team battles and direct free play DONE
- Big influencers and product partnerships DONE
- Emperor Play Markets

Q1 2026 - Scaling Infrastructure & UX

- Advanced features for The Last Emperor
- Special Battle features for Emperor Play Markets
- XP + Tier system rollout across the products
- Strategic partnerships with huge wallet apps + NFT tools
- · Begin fiat on-ramp UX testing
- . DAO voting for features and skill:balance ratio in The Last Emeperor

Q2 2026 - Global Access & Institutional Alignment

- \$EMPI staking launch + long-term holder reward pools
- Launch of "Emperor Market Index" top tokens, players, and XP dashboards
- · Regional expansion via language-localised portals and campaigns
- CEX Tier-1 listing push (targeting OKX, Bybit)
- Full rollout of Emperor Treasury Dashboard for earnings transparency
- Gamified empire-building challenge: long-form competition tied to governance

Emperor Unique Selling Points

Emperor Games in introducing new dimensions in the crypto gaming universe

- The Last Emperor
 - o multiplayer
 - o skill based game
 - o mass fun shooter
 - o crypto native integrated
 - o community battles, private battles etc
- Emperor Play Markets are unique fun and community remake of exchange markets and predictions
 - Players choose their preference and play/enter the pool
 - Pools generate rewards and after market/event resolution rewards are distributed between the winners
 - o Various market/events are supported

Fairness by Design

- Unlike traditional launchpads that prioritize big wallets or insider deals, Emperor X introduces a sweepstake launch model with:
 - No dev buy caps
 - Limited listings (5 coins per 30 minutes)
 - Automated buybacks of \$EMPI from trading volume

Unified Token Ecosystem

- \$EMPI is the central currency across Emperor Play Markets, Emperor X, Last Emperor and Emperor Games
- It's not just a pass-through token it's actively bought back, used for perks, and embedded into every layer of the experience.

GameFi + TradeFi Synergy

 Most gaming tokens or launchpads operate in isolation. EMPI creates a feedback loop: trade → earn points → play games → earn rewards → buy NFTs → gain perks → trade better. Every action fuels another – all connected by \$EMPI.

Market Capture Strategy

Emperor go-to-market approach focuses on:

- 1. Targeting underserved but hyper-engaged regions (e.g. Southeast Asia, Turkey) through ambassadors and mobile-first UX
- 2. Leveraging virality via Twitter/Telegram/Discord campaigns and sweepstake gamification
- 3. Incentivizing activity loops, not just token holding players and traders are rewarded for doing what they already enjoy
- 4. Onboarding creators through no-code NFT tools and profit-sharing launchpad mechanics
- 5. Focus on community trust, transparency, and fairness, a clear gap in most crypto launchpads

In short, while others fragment user attention, EMPI builds one empire — unified, gamified, and engineered for long-term dominance.

Conclusion

Emperor is more than a project — it's a living, expanding gamified Web3 empire.

Featuring gamified launchpad built on fairness, a dynamic gaming hub with real value flows, a unique gaming platform for creators, own unique games like Last Emperor, Meme Trader, Meme Crash, Wheel of Emperor etc, all connected, designed to reinforce the others, and built for the long term.

At the heart of this growing empire is \$EMPI – the token that powers, connects, and rewards participation across the entire platform. But \$EMPI is not the brand – Emperor is. The Emperor brand represents scale, quality, fairness, and vision. It's the infrastructure layer for Web3 entertainment, creator economies, and next-generation token launches. We're not here to chase trends. We're here to build a legacy.

As the Emperor ecosystem expands through gameplay, trading, future NFT innovation, and community-led governance, its mission remains clear:

To create the most rewarding, transparent, and engaging ecosystem in Web3, where users aren't just players, they're stakeholders.

Whether you're a builder, investor, gamer, or creator, this is your empire too.

The Emperor is rising
